

## Our Library Landscape

Help the library look its best, and bring a moment of natural beauty and tranquility to those who visit.

### What kinds of plants?

We hope to have a mix of pollinator-friendly, native, and low maintenance trees, shrubs and perennials that have seasonal interest throughout the year.

### About the Design

The library's landscape design was graciously donated by landscape architect Joe Wassam.

We are taking it in phases as we can, and finding what works for us.

*Phase One:* Planting around the old section of the building.  
Possibly a gazebo. Remove old garden beds.

*Phase Two:* Planting around new section of the building, access ramp, and along rear parking lot. Some details depend on plans for a future building addition.

### Ways to Help

- Donate to the Landscape Fund
- Volunteer for planning and organizing
- Volunteer for garden work
